## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, group I, drawn to a tower and method of assembly, classified in class 52, subclass 651.01.
- II. Claims 27-30, group II, drawn to a tower bracing and method of bracing, classified in class 52.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group II, a tower bracing, has separate utility such as for use with towers and platforms of various configurations. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
